## We are more than water

At EMASESA, we not only want to provide access to water, but we also **aspire to improve people's quality of life** by improving the social, economic and environmental surroundings of local communities.

- Securing access to a limited resource
- Developing an efficient, public activity for the integral water cycle with continuous improvement to services
- Providing quality service based on ethical, sustainable and transparent criteria
- Involving all of our stakeholders
- Promoting knowledge and professional development
- Fighting against climate change and promoting environmental awareness
- Our contribution to the Sustainable Development Goals

Subsidised water rates

Cátedra del Agua

Water Observatory

Water Training Centre

commitment · innovation · integrity · participation · training · dissemination · responsibility

## Our priority: The Environment

Seville was the first regional capital in Spain to approve the **Declaration of the State of Environmental Emergency**. We are therefore redoubling our efforts **to take care of the environment and to be more efficient**.

**Commissioning of SUDS constructions**  
(Sustainable Urban Drainage Systems)

**Circular economy:**

- ▷ We turn waste into useful resources
- ▷ Energy production in our hydroelectric power plants, production of biogas and photovoltaic power generation

**Energy Efficiency Plan**

**We promote sustainable mobility** in the form of electric vehicles

**Education programs for environmental sustainability**

## Our challenge: digital transformation

We are working on the **complete transformation** of the service we provide

- ▷ More automated water conveyance and treatment
- ▷ Intelligent network management
- ▷ Citizen science and user service: electronic office and MiEmasesa App

## Our facilities

### 6 reservoirs

- ◆ Aracena
- ◆ Zufre
- ◆ La Minilla
- ◆ El Gergal
- ◆ Cala
- ◆ Melonares

### 5 Offices
